Introduction

Welcome to Cal State Fullerton student. This guide is intended to give you tips and tricks on what to do on campus to succeed in school life. The guide will tell you about some quality of life things on the campus like where to go to relax and things the school has to offer to help you to succeed.

Quality of Life

Entertainment

At the titan student union building (TSU), you have access to a variety of games to pass the time if you get bored. There's bowling, billiards, arcade machines, and table tennis for you to enjoy. The prices for those games are relatively low compared to other places like round one or something. The hourly rate for these games should be \$5 per hourly rate, and they'll pay you back the change if you don't use up the hour so you can save money as well. There are also other things, such as plays for you to watch and sports events to entertain yourself as well. So there's a variety of ways to enjoy yourself at school if you ever get bored so have fun. The entertainment is on the basement floor.

Parking

Parking on campus is generally a horrendous experience during the noon. In the morning hours and evening hours, there will be space available, but at noon between around 11 A.M. to 2 P.M. Every parking space is filled up, making it hard to find a parking spot. There is assisted parking so you can leave it to the valets to park for you. For those who don't want to buy a parking permit for an entire semester since it'll make your wallet cry, or spend \$10 every day for the daily permit, there is parking available outside the campus.

Exercise

If you're worried about your physical health or want to lose weight, the campus has the recreational center for you go and exercise. They also have a swimming pool and outdoor activities for you to enjoy, such as rock climbing. They also have free

classes for you to attend to help get fit faster with high-intensity workouts or learn new techniques for fitness.

What the school offers

Free Software

The school offers a variety of free software for students. Some of the most notable ones are Office 365, Windows 10, Grammarly and Dropbox free to download. The webpage will guide you on how to install the software, but it's mostly just signing into the account with your school email to get the software. To find it, go to the Fullerton's webpage and go to student services. From there go to software, and you will see all the software you can download.

Renting Equipment

The school allows you to check out equipment for daily use. But they also allow you to check out laptops for the term so you can have access to a laptop during the semester. You can find the page by going to student services > equipment checkout. However, to rent the laptop, you will need your instructor to submit a request. The page will also tell you about any other requirements needed. The laptop is installed with Windows 10 or for mac laptops, their Mac Operating System X. The program is best suited for those who don't have a computer available to them at home, so if you're one of those, rent one out today to make your semester easier.

Library

The library is a great resource. You can find many required textbooks for many classes there, and although you cannot take them home with you, being able to look at them can be a great resource if you've forgotten your book or are waiting for it to arrive in the mail. There is also an extensive collection of fiction if you're looking for entertainment. There is also ample study space available, and you will not have trouble finding a cubicle. If you need an outlet, however, be prepared to walk around and wait for someone to get up because cubicles with outlets are limited. The third floor is the best place to look for an outlet, but it can still be a struggle to find one. However, in return, the library also has charge stations in the library, so if you can't find an outlet, you can charge your electronics there.

Academics

Advising

Whether you just graduated high school or just transferred, it is essential to know your current academic standing. Advising is highly recommended to keep track and ensure that you graduate on time. You want to make sure you aren't taking any additional courses, and you can avoid this by meeting with your academic advisors that are in the department building. Or, if you cannot wait to make an appointment, you can check out your Titan Degree Audit (TDA).

Tutoring

Tutoring is another service that every student should use. If you are looking for extra help, you can visit the Mihaylo College of Business and Economics (MCBS) Tutoring center or the English Department Writing Center. CSUF has tutors who are majors in their department to help you in your major. For instance, the Computer Science building has available tutors in rooms 201 and 401.

Conclusion

We hope this guide was informative and gave you some insight into the campus. Now, fellow Titan, you have all the resources needed to experience Cal State Fullerton at its full potential. Good luck, and remember to have fun while you succeed.
